

# SOLUTION

- To address the challenges, we developed a bespoke app using Glide that caters to the needs of both the client and potential customers.
- The app provides a comprehensive showcase of all the client's tours, including detailed information and pricing.
- Users can easily send tour requests or join existing tours as guests directly through the app.
- A loyalty program has been integrated, tracking organized tours by individuals and offering tour discounts to encourage agent-driven tour organization.
- Ratings and reviews of each tour allow potential customers to make informed decisions.
- The app is seamlessly connected to Social media via Make.com, creating announcements for open tours available for strangers to join, maximizing tour participation.
